Test 2 Advice

Test 2 covers the material from weeks four to seven as per the schedule provided on the course web site with the exception of sections 5.3 and 5.4. It is suggested that students prepare themselves for the test by reviewing those questions on the 2003 tests 2 (specifically questions 4 onwards) and 3 and the 2004 tutorial sheets four to seven (all on the 2004 course web site) that relate to the sections covered by the test. Otherwise, test 2 will operate under similar conditions to test 1:

- the test is open book (any materials may be taken into the test),
- the test will be held in week eight with the timing of the test at the various campuses to be announced at the lectures,
- the test is 45 minutes, from five minutes past the hour to ten minutes to the hour,
- there will be questions totalling 180 marks on the test and the final mark out of 15 will be obtained by dividing the score out of 180 by 10 (with a maximum mark of 15),
- students should attempt as many questions as they can in the time available,
- full working must be shown to obtain maximum credit,
- students are required to bring along writing materials (pens, paper, pencils),
- students will be required to present their student ID,
- students will not be allowed to take the test away with them (it will however be returned with the marked test),
- an endeavour will be made to return marked tests to students and post solutions to the course web site by the end of week 9.
